www.TROLLSYSTEMS.com

Troll Systems is looking for a great PROGRAM MANAGER someone who wants to achieve incredible outcomes. At the end of the day, your projects will save lives, stop criminals, aid in the battle with wild fires or provide security for a nation. It's what customers call the tip of spear, but around here it's another career that can move in high-gear.

Troll is a worldwide leader in the development HD video data links, tracking antennas and control systems designed to deliver image intelligence, surveillance and reconnaissance from manned and unmanned aircraft, land and marine vehicles. Troll employees work in a truly exciting industry, with enormous growth potential; Troll products are used by militaries, commercial broadcasters, police, fire, and search and rescue organizations all over the world.

Troll is currently seeking a technically-sophisticated Program Manager with the ability to manage complex projects. Will act as the primary customer contact on status and performance of active projects and fulfill customer needs to ensure their satisfaction and continued business. Candidate must demonstrate the ability to work with customers in government, military, and paramilitary organizations, managing their expectations to achieve success.

This position is supported by the engineering and system integration teams to evaluate customer requirements and develop/create solutions. Candidate must be technically-adept leader who listens to customers, clearly communicates objectives, and helps accomplish their goals.

## EXPERIENCE

### An ideal candidate will demonstrate a history of:

- Program Management of multiple highly-complex programs working with U.S. and foreign military and other government agencies, first-tier defense contractors, state and local governments, law enforcement, third-party integrators, and OEM aircraft manufacturers.
- A strong technical understanding of communications, microwave, and airborne surveillance applications and systems.
- Possess Project Management Professional (PMP) Certification and have 5-10 years of experience in both civilian and military sectors.
- Experience with C3/ISR military systems, including antenna systems, advanced software control for airborne and ground asset tracking, and microwave transmission equipment.
- Microwave antennas and control equipment
- C3 products for airborne applications
- High-speed data link equipment
- Turn-key communications and control solutions
- Specialized cameras, controllers or other airborne surveillance gear
- Command and Control computers and consoles

## RESPONSIBILITIES and EXPECTATIONS

- Ensure all program requirements are completed on time and within budget.
- Track program/project progress and report status to appropriate departmental managers, teams, and customers.
- Review and validate cost estimates, reports, and other documentation to ensuring accuracy.
- Ensure compliance with ITAR/FAR/DoD and other regulatory compliance agency guidelines and standards as required.
- Build and maintain strong relationships with existing and potential customers.
- Coordinate efforts with multiple technical and departmental managers for resource allocation, strategic planning, and scheduling to ensure 100% on time delivery and customer satisfaction.
- Utilize strong communication skills to secure and maintain relationships in and outside the company.
- Be able to function in a fast-paced environment with emphasis placed on creativity and innovation.
- Travel up to 15% of the time in support of above only as necessary.

Must be a U.S. citizen or Green Card holder for authorized access to controlled technology/data as subject to ITAR as well as possess both a valid driver's license and passport. This position reports to the VP of Operations and requires the utmost in loyalty and integrity with strategy for managing key customer accounts and relationships. Compensation is commensurate with experience. Position location is in Valencia, CA. Relocation is not available for this position.
